

INDEX OF AUTHORS

VOLUME XXIV

TRANSACTIONS OF AMERICAN SOCIETY FOR METALS

January, 1936—December, 1936

A		K	
Ackley, R. A.	46	Kanter, J. J.	870
Andersen, A. G. H.	375, 519	King, H. J.	721
Armstrong, T. N.	567	Kraus, C. E.	186
Arness, W. B.	701		
Austin, Charles R.	451, 481	L	
B		Lucas, Francis F.	1
Baeyertz, M.	420	M	
Bain, E. C.	225	Maxwell, H. L.	213
Boston, O. W.	186	McBride, D. L.	281
Brophy, G. R.	154, 919	McCollam, C. H.	133
C		McMullan, O. W.	262
Chipman, John	313	Mehl, R. F.	46, 281, 595
Clark, C. L.	831	Murphy, D. W.	75
Claussen, Gerard E.	640	P	
Conley, W. E.	721	Parker, E. R.	919
Conley, W. J.	721	Post, Carl B.	679
Cook, Earnshaw	649	R	
D		Rowland, D. H.	96
Daniloff, B. N.	595	S	
deForest, A. V.	783	Sayre, M. F.	932
E		Schwartz, H. A.	551
Ellinger, George A.	26	Sykes, W. P.	541
Ellis, Owen W.	943	U	
F		Unger, L. E.	721
Fontana, M. G.	313	Upthegrove, Clair	96
G		V	
Gilbert, W. W.	186	Vilella, J. R.	225
Gill, James P.	735	W	
Goss, N. P.	967	Walters, Jr., F. M.	359
Guellich, G. E.	225	Warrick, D. L.	133
H		Wells, Cyril	46, 359
Herty, Jr., C. H.	281, 595	White, A. E.	831
Hoyt, S. L.	789	Wood, W. P.	75
J		Y	
Jette, Eric R.	375, 519	Yensen, T. D.	337
Johnson, H. H.	551	Z	
Junge, C. H.	551	Ziegler, N. A.	337

INDEX OF SUBJECTS AND AUTHORS OF PAPERS

VOLUME XXIV

TRANSACTIONS OF AMERICAN SOCIETY FOR METALS

January, 1936—December, 1936

A

Age-Hardening Alloys; High Temperature Properties of Nickel-Cobalt-Iron Base—Part I— <i>Charles R. Austin</i>	451
Age-Hardening Alloys; High Temperature Properties of Nickel-Cobalt-Iron Base—Part II— <i>Charles R. Austin</i>	481
Aggregate Constituents in Steel; Naming the— <i>J. R. Vilella, G. E. Guellich and E. C. Bain</i>	225
Aging of Mild Steels; Influence of Deoxidation on the— <i>B. N. Daniloff, R. F. Mehl and C. H. Herty, Jr.</i>	595
Alloys; Effect of Carbon, Oxygen and Grain-Size on the Magnetic Properties of Iron-Silicon— <i>T. D. Yensen and N. A. Ziegler</i>	337
Alloys; High Temperature Properties of Nickel-Cobalt-Iron Base Age-Hardening—Part I— <i>Charles R. Austin</i>	451
Alloys; High Temperature Properties of Nickel-Cobalt-Iron Base Age-Hardening—Part II— <i>Charles R. Austin</i>	481
Alloys of Iron, Manganese and Carbon, Part XV— <i>F. M. Walters, Jr. and Cyril Wells</i>	359
Alloy Steels; Arc Welding of High Carbon and— <i>T. N. Armstrong</i>	567
Alpha-Gamma Transformation High Purity Iron; Dilatometric Study of the— <i>C. Wells, R. A. Ackley and R. F. Mehl</i>	46
Ammonia Synthesis; Physical Properties of Metals as Affected by Conditions of— <i>H. L. Maxwell</i>	213
Annual Banquet	1056
Arc Welding of High Carbon and Alloy Steels— <i>T. N. Armstrong</i>	567
Austenitic Grain-Size in Cast Iron— <i>D. W. Murphy and W. P. Wood</i>	75

B

Base Age-Hardening Alloys; High Temperature Properties of Nickel-Cobalt-Iron—Part I— <i>Charles R. Austin</i>	451
Base Age-Hardening Alloys; High Temperature Properties of Nickel-Cobalt-Iron—Part II— <i>Charles R. Austin</i>	481

C

Carbide Segregate and Grain Size; High Speed Steel— <i>James P. Gill</i>	735
Carbides in the 18-8 Type Stainless Steels; Sodium Cyanide Metallographic Etch Test for Revealing Precipitated— <i>W. B. Arness</i>	701
Carbon; Alloys of Iron, Manganese and—Part XV— <i>F. M. Walters, Jr. and Cyril Wells</i>	359
Carbon and Alloy Steels; Arc Welding of High— <i>T. N. Armstrong</i>	567
Carbon, Oxygen and Grain-Size on the Magnetic Properties of Iron-Silicon Alloys; Effect of— <i>T. D. Yensen and N. A. Ziegler</i>	337
Carbon Strip Steels; Preferred Orientation and Rolling Characteristics of Low— <i>Carl B. Post</i>	679
Case Hardened Gears; Endurance of— <i>O. W. McMullan</i>	262
Cast Iron; Austenitic Grain-Size in— <i>D. W. Murphy and W. P. Wood</i>	75
Characteristics of Low Carbon Strip Steels; Preferred Orientation and Rolling— <i>Carl B. Post</i>	679
Characteristics of Metals; Creep— <i>C. L. Clark and A. E. White</i>	831
Chromium-Iron-Silicon Phase Diagram; X-Ray Investigation— <i>A. G. H. Andersen and Eric R. Jette</i>	375

	Cobalt-Nickel-Iron Base Age-Hardening Alloys; High Temperature Properties of—Part I— <i>Charles R. Austin</i>	451
	Cobalt-Nickel-Iron Base Age-Hardening Alloys; High Temperature Properties of—Part II— <i>Charles R. Austin</i>	481
	Cold Working and Recrystallization Structure; Hot Working— <i>N. P. Goss</i>	967
	Commercial Steels; Effect of Deoxidation on the Rate of Formation of Ferrite in— <i>D. L. McBride, C. H. Herty, Jr. and R. F. Mehl</i>	281
	Conditions of Ammonia Synthesis; Physical Properties of Metals as Affected by— <i>H. L. Maxwell</i>	213
	Constituents in Steel; Naming the Aggregate— <i>J. R. Vilella, G. E. Guellich and E. C. Bain</i>	225
	Control; Open-Hearth Temperature— <i>Earnshaw Cook</i>	649
	Creep Characteristics of Metals— <i>C. L. Clark and A. E. White</i>	831
	Creep Results; Interpretation and Use of— <i>J. J. Kanter</i>	870
451	Crystals and Plastic Deformation; Metallic Single— <i>S. L. Hoyt</i>	789
481	Cutting Speed-Tool Life Curve; Factors Influencing the Nature of the — <i>O. W. Boston, W. W. Gilbert and C. E. Kraus</i>	186
225	Cyanide Metallographic Etch Test for Revealing Precipitated Carbides in the 18-8 Type Stainless Steels; Sodium— <i>W. B. Arness</i>	701

D

337	Damping Capacity, A Factor in Fatigue— <i>G. R. Brophy</i>	154
451	Damping Capacity—Its Variation and Relation To Other Physical Properties— <i>G. R. Brophy and E. R. Parker</i>	919
481	Decarburization of Steel; Grain-Size and Its Influence on Surface— <i>D. H. Rowland and Clair Upthegrove</i>	96
359	Deformation; Laws and Fundamentals of Plastic— <i>A. V. deForest</i>	783
567	Deformation; Metallic Single Crystals and Plastic— <i>S. L. Hoyt</i>	789
46	Deformation of Materials in the Single-Blow Drop Test; Effect of the Shape of the Test Piece upon the Energy Needed— <i>Owen W. Ellis</i>	943
213	Deoxidation on the Aging of Mild Steels; Influence of— <i>B. N. Daniloff, R. F. Mehl and C. H. Herty, Jr.</i>	595
1056	Deoxidation on the Rate of Formation of Ferrite in Commercial Steels; Effect of— <i>D. L. McBride, C. H. Herty, Jr. and R. F. Mehl</i>	281
567	Diagram; X-Ray Investigation of the Iron-Chromium-Silicon Phase— <i>A. G. H. Andersen and Eric R. Jette</i>	375
75	Diffusion of Elements in Solid Iron— <i>Gerard E. Claussen</i>	640
	Dilatometric Study of the Alpha-Gamma Transformation in High Purity Iron— <i>C. Wells, R. A. Ackley and R. F. Mehl</i>	46
451	Drop Test; Effect of the Shape of the Test Piece upon the Energy Needed to Deform Materials in the Single-Blow— <i>Owen W. Ellis</i>	943

E

735	Effect of Carbon, Oxygen and Grain-Size on the Magnetic Properties of Iron-Silicon Alloys— <i>T. D. Yensen and N. A. Ziegler</i>	337
701	Effect of Deoxidation on the Rate of Formation of Ferrite in Commercial Steels— <i>D. L. McBride, C. H. Herty, Jr. and R. F. Mehl</i>	281
359	Effect of the Shape of the Test Piece upon the Energy Needed to Deform Materials in the Single-Blow Drop Test— <i>Owen W. Ellis</i>	943
567	Elastic Properties and Their Relationship to Strength and to Strain Hardening— <i>M. F. Sayre</i>	932
337	Electrolytic Etching Reagent for Stainless Steels; Oxalic Acid as an— <i>George A. Ellinger</i>	26
679	Electrolytic Potentials as Affected by Scaling Temperature; Pickle Pitting by— <i>C. H. McCollam and D. L. Warrick</i>	133
262	Elements in Solid Iron; Diffusion of— <i>Gerard E. Claussen</i>	640
75	Endurance of Case Hardened Gears— <i>O. W. McMullan</i>	262
679	Equilibrium in the Reaction of Hydrogen with Ferrous Oxide in Liquid Iron at 1600 Degrees Cent.— <i>M. G. Fontana and John Chipman</i>	313
831	Etching Reagent for Stainless Steels; Oxalic Acid as an Electrolytic— <i>George A. Ellinger</i>	26
375	Etch Test for Revealing Precipitated Carbides in the 18-8 Type Stainless Steels; Sodium Cyanide Metallographic— <i>W. B. Arness</i>	701

F

Factors in Fatigue; Damping Capacity— <i>G. R. Brophy</i>	154
Factors Influencing the Nature of the Cutting Speed-Tool Life Curve— <i>O. W. Boston, W. W. Gilbert, and C. E. Kraus</i>	186
Fatigue; Damping Capacity, A Factor in— <i>G. R. Brophy</i>	154
Ferrite in Commercial Steels; Effect of Deoxidation on the Rate of Formation of— <i>D. L. McBride, C. H. Herty, Jr. and R. F. Mehl</i>	281
Ferrous Oxide in Liquid Iron at 1600 Degrees Cent.; Equilibrium in the Reaction of Hydrogen with— <i>M. G. Fontana and John Chipman</i>	313
Formation of Ferrite in Commercial Steels; Effect of Deoxidation on the Rate of— <i>D. L. McBride, C. H. Herty, Jr. and R. F. Mehl</i>	281
Fundamentals of Plastic Deformation; Laws and— <i>A. V. deForest</i>	783

G

Gears; Endurance of Case Hardened— <i>O. W. McMullan</i>	262
Grain-Size and Its Influence on Surface Decarburization of Steel— <i>D. H. Rowland and Clair Upthegrove</i>	96
Grain Size; High Speed Steel, Carbide Segregate— <i>James P. Gill</i>	735
Grain-Size in Cast Iron; Austenitic— <i>D. W. Murphy and W. P. Wood</i>	75
Grain-Size on the Magnetic Properties of Iron-Silicon Alloys; Effect of Carbon, Oxygen and— <i>T. D. Yensen and N. A. Ziegler</i>	337
Graphitizing Reaction; Some Transient Phase Changes During the— <i>H. A. Schwartz, H. H. Johnson and C. H. Junge</i>	551

H

Hardened Gears; Endurance of Case— <i>O. W. McMullan</i>	262
Hardening; Elastic Properties and Their Relationship to Strength and to Strain— <i>M. F. Sayre</i>	932
High Carbon and Alloy Steels; Arc Welding of— <i>T. N. Armstrong</i>	567
High Purity Iron; Dilatometric Study of the Alpha-Gamma Transformation in— <i>C. Wells, R. A. Ackley and R. F. Mehl</i>	46
High Speed Steel, Carbide Segregate and Grain Size— <i>James P. Gill</i>	735
High Temperature Properties of Nickel-Cobalt-Iron Base Age-Hardening Alloys—Part I— <i>Charles R. Austin</i>	451
High Temperature Properties of Nickel-Cobalt-Iron Base Age-Hardening Alloys—Part II— <i>Charles R. Austin</i>	481
Hot Working, Cold Working and Recrystallization Structure— <i>N. P. Goss</i>	967
Hydrogen with Ferrous Oxide in Liquid Iron at 1600 Degrees Cent.; Equilibrium in the Reaction of— <i>M. G. Fontana and John Chipman</i> ...	313

I

Influence of Deoxidation on the Aging of Mild Steels— <i>B. N. Daniloff, R. F. Mehl and C. H. Herty, Jr.</i>	595
Influence on Surface Decarburization of Steel; Grain-Size and its— <i>D. H. Rowland and Clair Upthegrove</i>	96
Influencing the Nature of the Cutting Speed-Tool Life Curve; Factors— <i>O. W. Boston, W. W. Gilbert, and C. E. Kraus</i>	186
Interpretation and Use of Creep Results— <i>J. J. Kanter</i>	870
Investigation of the Iron-Chromium-Silicon Phase Diagram; X-Ray— <i>A. G. H. Andersen and Eric R. Jette</i>	375
Investigations; On the Preparation of Iron and Steel Specimens for Microscopic— <i>Francis F. Lucas</i>	1
Iron and Steel Specimens for Microscopic Investigations; on the Preparation of— <i>Francis F. Lucas</i>	1
Iron at 1600 Degrees Cent.; Equilibrium in the Reaction of Hydrogen with Ferrous Oxide in Liquid— <i>M. G. Fontana and John Chipman</i>	313
Iron; Austenitic Grain-Size in Cast— <i>D. W. Murphy and W. P. Wood</i>	75
Iron-Chromium-Silicon Phase Diagram; X-Ray Investigation— <i>A. G. H. Andersen and Eric R. Jette</i>	375
Iron; Diffusion of Elements in Solid— <i>Gerard E. Claussen</i>	640

Iron; Dilatometric Study of the Alpha-Gamma Transformation in High Purity— <i>C. Wells, R. A. Ackley and R. F. Mehl</i>	46
Iron, Manganese and Carbon; Alloys of—Part XV— <i>F. M. Walters, Jr. and Cyril Wells</i>	359
Iron-Molybdenum; Notes on the Solidus Temperatures in the Systems Iron-Tungsten— <i>W. P. Sykes</i>	541
Iron-Nickel-Cobalt Base Age-Hardening Alloys; High Temperature Properties of—Part I— <i>Charles R. Austin</i>	451
Iron-Silicon Alloys; Effect of Carbon, Oxygen and Grain-Size on the Magnetic Properties of— <i>T. D. Yensen and N. A. Ziegler</i>	337
Iron-Tungsten and Iron-Molybdenum; Notes on the Solidus Temperatures in the Systems— <i>W. P. Sykes</i>	541

L

Laws and Fundamentals of Plastic Deformation— <i>A. V. deForest</i>	783
Liquid Iron at 1600 Degrees Cent.; Equilibrium in the Reaction of Hydrogen with Ferrous Oxide in— <i>M. G. Fontana and John Chipman</i>	313
Low Carbon Strip Steels; Preferred Orientation and Rolling Characteristics of— <i>Carl B. Post</i>	679

M

Magnetic Properties of Iron-Silicon Alloys; Effect of Carbon, Oxygen and Grain-Size on the— <i>T. D. Yensen and N. A. Ziegler</i>	337
Manganese and Carbon; Alloys of Iron—Part XV— <i>F. M. Walters, Jr. and Cyril Wells</i>	359
Metallic Single Crystals and Plastic Deformation— <i>S. L. Hoyt</i>	789
Metallographic Etch Test for Revealing Precipitated Carbides in the 18-8 Type Stainless Steels; Sodium Cyanide— <i>W. B. Arness</i>	701
Metals as Affected by Conditions of Ammonia Synthesis; Physical Properties of Metals— <i>H. L. Maxwell</i>	213
Metals; Creep Characteristics of— <i>C. L. Clark and A. E. White</i>	831
Methods for Ternary Systems; X-Ray— <i>A. G. H. Andersen and Eric R. Jette</i>	519
Microcharacter as a Research Tool— <i>W. J. Conley, W. E. Conley, H. J. King and L. E. Unger</i>	721
Microscopic Investigations; On the Preparation of Iron and Steel Specimens for— <i>Francis F. Lucas</i>	1
Mild Steels; Influence of Deoxidation on the Aging of— <i>B. N. Daniloff, R. F. Mehl and C. H. Hertly, Jr.</i>	595
Molybdenum Iron; Notes on the Solidus Temperatures in the Systems Iron-Tungsten— <i>W. P. Sykes</i>	541

N

Naming the Aggregate Constituents in Steel— <i>J. R. Vilella, G. E. Guellich and E. C. Bain</i>	225
Nature of the Cutting Speed-Tool Life Curve; Factors Influencing the— <i>O. W. Boston, W. W. Gilbert and C. E. Kraus</i>	186
Nickel-Cobalt-Iron Base Age-Hardening Alloys; High Temperature Properties of—Part I— <i>Charles R. Austin</i>	451
Nickel-Cobalt-Iron Base Age-Hardening Alloys; High Temperature Properties of—Part II— <i>Charles R. Austin</i>	481
Notes on the Solidus Temperatures in the Systems Iron-Tungsten and Iron-Molybdenum— <i>W. P. Sykes</i>	541

O

Observations on the Oxidation of Steel— <i>M. Baeyertz</i>	420
Open-Hearth Temperature Control— <i>Earnshaw Cook</i>	649
Orientation and Rolling Characteristics of Low Carbon Strip Steels— <i>Carl B. Post</i>	679

Oxalic Acid as an Electrolytic Etching Reagent for Stainless Steels— <i>George A. Ellinger</i>	26
Oxidation of Steel; Observations on the— <i>M. Baeyertz</i>	420
Oxide in Liquid Iron at 1600 Degrees Cent.; Equilibrium in the Reaction of Hydrogen with Ferrous— <i>M. G. Fontana and John Chipman</i>	313
Oxygen and Grain-Size on the Magnetic Properties of Iron-Silicon Alloys; Effect of Carbon— <i>T. D. Yensen and N. A. Ziegler</i>	337

P

Physical Properties; Damping Capacity—Its Variation and Relation to Other— <i>G. R. Brophy and E. R. Parker</i>	919
Physical Properties of Metals as Affected by Conditions of Ammonia Synthesis— <i>H. L. Maxwell</i>	213
Phase Changes During the Graphitizing Reaction; Some Transient— <i>H. A. Schwartz, H. H. Johnson and C. H. Junge</i>	551
Phase Diagram; X-Ray Investigation of the Iron-Chromium-Silicon— <i>A. G. H. Andersen and Eric R. Jette</i>	375
Pickle Pitting by Electrolytic Potentials as Affected by Scaling Tempera- ture— <i>C. H. McCollam and D. L. Warrick</i>	133
Pitting by Electrolytic Potentials as Affected by Scaling Temperature; Pickle— <i>C. H. McCollam and D. L. Warrick</i>	133
Plastic Deformation; Laws and Fundamentals of— <i>A. V. deForest</i>	783
Plastic Deformation; Metallic Single Crystals and— <i>S. L. Hoyt</i>	789
Potentials as Affected by Scaling Temperature; Pickle Pitting by Electro- lytic— <i>C. H. McCollam and D. L. Warrick</i>	133
Precipitated Carbides in the 18-8 Type Stainless Steels; Sodium Cyanide Metallographic Etch Test for Revealing— <i>W. B. Arness</i>	701
Preferred Orientation and Rolling Characteristics of Low Carbon Strip Steels— <i>Carl B. Post</i>	679
Preparation of Iron and Steel Specimens for Microscopic Investigations; On the— <i>Francis F. Lucas</i>	1
President's Report	1040
Properties and Their Relationship to Strength and to Strain Hardening; Elastic— <i>M. F. Sayre</i>	932
Properties; Damping Capacity—Its Variation and Relation to Other Physical— <i>G. R. Brophy and E. R. Parker</i>	919
Properties of Iron-Silicon Alloys; Effect of Carbon, Oxygen and Grain- Size on the Magnetic— <i>T. D. Yensen and N. A. Ziegler</i>	337
Properties of Metals as Affected by Conditions of Ammonia Synthesis; Physical— <i>H. L. Maxwell</i>	213
Properties of Nickel-Cobalt-Iron Base Age-Hardening Alloys; High Tem- perature—Part I— <i>Charles R. Austin</i>	451
Properties of Nickel-Cobalt-Iron Base Age-Hardening Alloys; High Tem- perature—Part II— <i>Charles R. Austin</i>	481
Purity Iron; Dilatometric Study of the Alpha-Gamma Transformation in High— <i>C. Wells, R. A. Ackley and R. F. Mehl</i>	46

R

Rate of Formation of Ferrite in Commercial Steels; Effect of Deoxidation on the— <i>D. L. McBride, C. H. Herty, Jr. and R. F. Mehl</i>	281
Reaction of Hydrogen with Ferrous Oxide in Liquid Iron at 1600 Degrees Cent.; Equilibrium in the— <i>M. G. Fontana and John Chipman</i>	313
Reaction; Some Transient Phase Changes During the Graphitizing— <i>H. A. Schwartz, H. H. Johnson and C. H. Junge</i>	551
Reagent for Stainless Steels; Oxalic Acid as an Electrolytic Etching— <i>George A. Ellinger</i>	26
Recrystallization Structure; Hot Working, Cold Working— <i>N. P. Goss</i> ...	967
Reports of Officers	1040
Research Tool; Microcharacter as a— <i>W. J. Conley, W. E. Conley, H. J. King and L. E. Unger</i>	721
Rolling Characteristics of Low Carbon Strip Steels; Preferred Orientation and— <i>Carl B. Post</i>	679

S

26	Scaling Temperature; Pickle Pitting by Electrolytic Potentials as Affected	133
20	by— <i>C. H. McCollam and D. L. Warrick</i>	1046
13	Secretary's Report	375
37	Silicon-Iron-Chromium Phase Diagram; X-Ray Investigation— <i>A. G. H. Andersen and Eric R. Jette</i>	943
	Single-Blow Drop Test; Effect of the Shape of the Test Piece upon the	789
	Energy Needed to Deform Materials in the— <i>Owen W. Ellis</i>	701
	Single Crystals and Plastic Deformation; Metallic— <i>S. L. Hoyt</i>	640
	Sodium Cyanide Metallographic Etch Test for Revealing Precipitated Car-	541
	bides in the 18-8 Type Stainless Steels— <i>W. B. Arness</i>	551
919	Solid Iron; Diffusion of Elements in— <i>Gerard E. Claussen</i>	1
213	Solidus Temperatures in the Systems Iron-Tungsten and Iron-Molybde-	26
	num; Notes on the— <i>W. P. Sykes</i>	701
551	Some Transient Phase Changes During the Graphitizing Reaction— <i>H. A. Schwartz, H. H. Johnson and C. H. Junge</i>	735
375	Specimens for Microscopic Investigations; On the Preparation of Iron	96
	and Steel— <i>Francis F. Lucas</i>	225
133	Stainless Steels; Oxalic Acid as an Electrolytic Etching Reagent for—	420
	<i>George A. Ellinger</i>	1
133	Stainless Steels; Sodium Cyanide Metallographic Etch Test for Revealing	567
783	Precipitated Carbides in the 18-8 Type— <i>W. B. Arness</i>	281
789	Steel; Carbide Segregate and Grain Size; High Speed— <i>James P. Gill</i>	595
	Steel; Grain-Size and Its Influence on Surface Decarburization of—	26
	<i>D. H. Rowland and Clair Upthegrove</i>	46
133	Steel; Naming the Aggregate Constituents in— <i>J. R. Vilella, G. E. Guellich and E. C. Bain</i>	213
701	Steel; Observations on the Oxidation of— <i>M. Baeyerts</i>	679
679	Steel Specimens for Microscopic Investigations; On the Preparation of	701
	Iron and— <i>Francis F. Lucas</i>	932
1	Steels; Arc Welding of High Carbon and Alloy— <i>T. N. Armstrong</i>	679
040	Steels; Effect of Deoxidation on the Rate of Formation of Ferrite in Com-	967
	mercial Steels— <i>D. L. McBride, C. H. Herty, Jr. and R. F. Mehl</i>	46
932	Steels; Influence of Deoxidation on the Aging of Mild— <i>B. N. Daniloff, R. F. Mehl and C. H. Herty, Jr.</i>	213
919	Steels; Oxalic Acid as an Electrolytic Etching Reagent for Stainless—	541
337	<i>George A. Ellinger</i>	519
213	Steels; Preferred Orientation and Rolling Characteristics of Low Carbon	
451	Strip— <i>Carl B. Post</i>	
481	Steels; Sodium Cyanide Metallographic Etch Test for Revealing Precipi-	
46	tated Carbides in the 18-8 Type Stainless— <i>W. B. Arness</i>	
	Strain Hardening; Elastic Properties and Their Relationship to Strength	
	and to— <i>M. F. Sayre</i>	
	Strip Steels; Preferred Orientation and Rolling Characteristics of Low	
	Carbon— <i>Carl B. Post</i>	
	Structure; Hot Working, Cold Working and Recrystallization— <i>N. P. Goss</i>	
	Study of the Alpha-Gamma Transformation in High Purity Iron; Dila-	
	tometric— <i>C. Wells, R. A. Ackley and R. F. Mehl</i>	
	Surface Decarburization of Steel; Grain-Size and Its Influence on— <i>D. H. Rowland and Clair Upthegrove</i>	
	Synthesis; Physical Properties of Metals as Affected by Conditions of	
	Ammonia— <i>H. L. Maxwell</i>	
	Systems Iron-Tungsten and Iron-Molybdenum; Notes on the Solidus Tem-	
	peratures in the— <i>W. P. Sykes</i>	
	Systems; X-Ray Methods for Ternary— <i>A. G. H. Andersen and Eric R. Jette</i>	

T

26	Technical Program and Reports of Officers—Eighteenth Annual Conven-	1037
967	tion of the Society.....	649
1040	Temperature Control; Open-Hearth— <i>Earnshaw Cook</i>	
721		
679		

Temperatures in the Systems Iron-Tungsten and Iron-Molybdenum; Notes on the Solidus— <i>W. P. Sykes</i>	541
Ternary Systems; X-Ray Methods for— <i>A. G. H. Andersen and Eric R. Jette</i>	519
Test; Effect of the Shape of the Test Piece upon the Energy Needed to Deform Materials in the Single-Blow Drop— <i>Owen W. Ellis</i>	943
Test Piece upon the Energy Needed to Deform Materials in the Single-Blow Drop Test; Effect of the Shape of the— <i>Owen W. Ellis</i>	943
Tool Life Curve; Factors Influencing the Nature of the Cutting Speed— <i>O. W. Boston, W. W. Gilbert, and C. E. Kraus</i>	186
Tool; Microcharacter as a Research— <i>W. J. Conley, W. E. Conley, H. J. King and L. E. Unger</i>	721
Transformation in High Purity Iron; Dilatometric Study of the Alpha-Gamma— <i>C. Wells, R. A. Ackley and R. F. Mehl</i>	46
Transient Phase Changes During the Graphitizing Reaction; Some— <i>H. A. Schwartz, H. H. Johnson and C. H. Junge</i>	551
Treasurer's Report	1043
Tungsten-Iron and Iron-Molybdenum; Notes on the Solidus Temperatures in the Systems— <i>W. P. Sykes</i>	541
